DBT GROUP

PHASE II

MINNESOTA MENTAL HEALTH CLINICS

ADULT DAY TREATMENT PROGRAM DBT PHASE II

DBT Phase II Group

This group is for clients who have completed an initial DBT Skills training course, show an understanding of the skills and commit to a consistent application of the skills. It will help clients with an advanced application and processing of the skills. This group focuses on greater integration of the skills into their lives.

Group members are expected to have made significant progress in reducing and or abstaining from their targeted Para suicidal (self harm) behaviors and are not actively suicidal.

Goals of the group are to strengthen their mindfulness practice (foundation skill) and interpersonal skills in order to enhance the group therapy process and to increase skillful behavior to improve one's quality of life.

Additional skills such as behavioral chain analysis and cognitive behavioral approaches will be taught along with skills covered in the four modules – Core Mindfulness; Interpersonal Effectiveness; Emotion Regulation; Distress Tolerance.

Clients are to be actively participating in individual therapy and will keep a diary card throughout the duration of group. Input will be obtained from the client's individual therapist to assist in the assessment for appropriateness for the group.

Most health insurance health plans provide coverage for group therapy. Please contact our office or your insurance carrier for information about your own coverage.

The group will meet Tuesday evenings from 5:30pm-7:30pm. For further information or to register for this group, please call 651-454-0114

REFERRAL PROCESS

Referrals are accepted from social workers, mental health professionals, hospitals or potential clients. If a client wants to schedule an intake appointment please call the clinic intake coordinator at 651-454-

0114. The intake coordinator will schedule a program assessment. If someone would like to get more information about one of the treatment programs please call the intake coordinator and the caller will be transferred to one of the DaTRAC therapists to answer questions.

ELIGIBILITY

All clients must be **18 years of age or older** and have a **source of funding** for the services provided. They must also have a **diagnosed mental health problem** and an **assessed significant impairment in functioning** which supports the need for either a day treatment or a specialized treatment service. Clients must have **the physical and cognitive ability to benefit from the services provided**. And finally, **the other service providers on the client's treatment team must also agree and actively support placement in the day treatment program**.

FUNDING INFORMATION

Most health insurance companies provide coverage for day treatment services. Clients will be fully advised as to the fees and possible payment plans. Whereas our staff verifies insurance eligibility, it is the client's responsibility to understand their benefit coverage and financial obligations.
